

Laser Smart Forms

Fast and Efficient

Laser Smart Forms provides new forms printing flexibility and can provide substantial per copy savings versus traditional pre-printed continuous forms. The one printer can now print multiple forms in a variety of formats and output options with automatic file copies.

Changes Implemented Quickly

Combined with Kyocera laser printer technology, the Laser Smart Forms solution provides the best output option for your forms printing needs.

Many Different Types of Forms and Business Logos

This product is suited to both small and large operations. In a small department, one printer can now be used to produce Repair Orders, Service Invoices, Purchase Orders, File Copies and Parts Invoices, on different paper stocks. Your business uses ordinary laser paper - no more pre-printed stationery. In a high volume operation, laser forms production can provide substantial cost savings over pre-printed forms.

LSF Solutions create custom form documents for your laser form business documents by attaching your company logos, graphic and address material to forms that match the variety of ERA business forms that you wish to produce.

The printer is now SMART and can also be told to automatically print a second copy to a different output tray with a form designed as a file copy for admin, as well as printing two sided (duplex) pages to reduce paper usage.

LSF Solutions design, print and deliver ERA and dealership printing throughout Australia every day. The exciting part of our job is working with the many people in the dealerships to assist them with their printing requirements. Our LSF Solutions product range is diverse, and our knowledge of the printing industry and specific dealership requirements makes the mutual goal of delivering a superior product very easy.

As well as our Laser Smart Forms product, we can also supply all types of pre-printed ERA business forms including ERA Repair Orders, Service Invoices, Parts Invoices, Statements, Cheques and Payslips. LSF Solutions also produce general printing items such as plastic customer loyalty cards and service reminder postcards.

Super Benefits

- Eliminates the need for pre-printed forms
- Automatic file copy feature
- Print on both front and back of form
- Flexibility of altering forms design
- Production of any business form on A4 paper
- Professional presentation of logos and corporate image
