DocuSmart Payables makes finance departments vastly more efficient. It will increase productivity and reduce cost per invoice by eliminating unnecessary unreliable and expensive manual processing.

Speed, accuracy and transparency.
It's efficient, fast and accurate, and you'll know from minute to minute exactly how your organisation is performing. You'll get total control over the process. Liabilities will be instantly visible. And compliance with your guidelines is guaranteed.

Absolute flexibility. Absolute control.
DocuSmart payables can work with any type of invoice, from e-invoices to paper. Paper invoices are scanned, converted into electronic format, identified as invoices and sent into the payables process.

The benefits of automation.
Because it's an automated process all invoices are validated the same way, regardless of how they're received. Automation occurs in data extraction, routing, posting to the appropriate business application and coding. It will match invoices with purchase orders if you're using them.

Together with DocuSmart Archive, everything is automatically captured and indexed.

Go to **pentanasolutions.com/edm** or call **1300 135 770** to find out more about how DocuSmart Payables can transform the finance department in your organisation and help you save money.

As well as paper.
