

Transfer knowledge, not paper.

How DocuSmart Scan can transform the processes within your organisation.

- Scan paper documents and PDF's
- Convert scans into searchable files
- Initiate workflows based on content
- Export to your business processes
- Integrate with DocuSmart Archive
- Manage your documents

DocuSmart

Document recognition

The system can scan paper documents and PDFs into searchable files, these files can then be categorised ready for application processing, based on anything from content and barcodes to fixed zone values. The system uses optical character recognition to identify all words in a document for easy retrieval.

Export to your business processes

Content values extracted can be used to initiate workflows or update your ERP system, without the need for manual entry.

Wide range of saving formats

DocuSmart Scan supports a wide range of output formats. The results can be sent directly to applications such as Adobe Acrobat and TIFF with full text extraction.

Integrates to DocuSmart Archive

Being part of the DocuSmart suite of products ensures that DocuSmart scan integrates fully with DocuSmart archiving, ensuring that all documents are searchable and retrievable in seconds.

Go to pentanasolutions.com/edm or call 1300 135 770 and discover how DocuSmart Scan can start processing documents fast and more efficiently and more profitably.

Which means no more boxes of copy paper cluttering up the stationery cupboard.

And no more photocopier.
