

Electronic Parts Catalogue

Electronic Parts Catalogue

Find obscure parts easily. Reduce error and part returns.
Improve CSI.

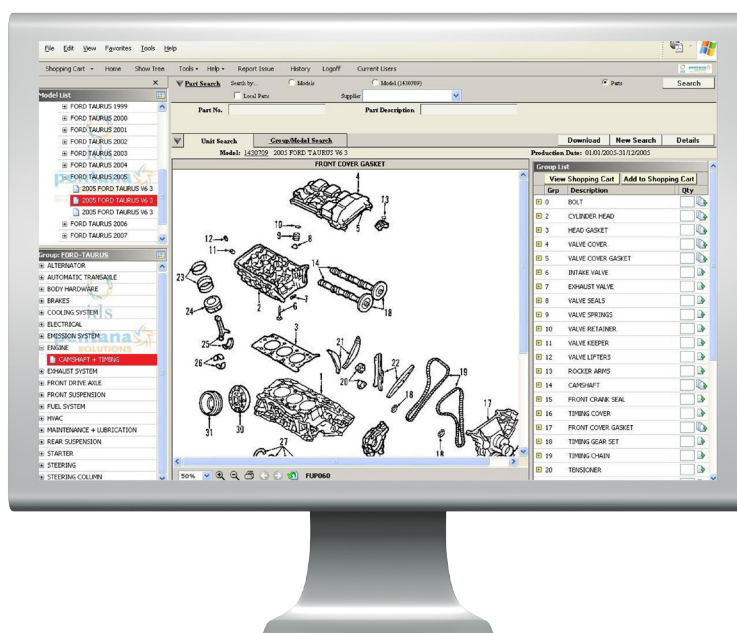

Pentana Solutions' Electronic Parts Catalogue is a real-time, integrated online parts catalogue that has been developed in partnership with our customers, taking advantage of decades of industry experience. That experience has afforded us the ability to reduce the number of vehicle offroad days your customers have and improve your current CSI.

Supplying the correct part in the shortest possible time-frame maximises profit, ensures repeat business and reduces overall cost. Pentana Solutions gives you the tools to ensure the correct part is ordered and delivered to the customer, the right way, the first time.

The way Pentana Solutions' EPC is integrated within the Dealer Management System is dealership changing. The Electronic Parts Catalogue can be deployed electronically over the internet, automatically ordering and delivering the correct part without manual keying. Updates of parts information, stock availability and pricing are available in real time; saving you part returns, money, time and disgruntled end customers.

Integrated E-commerce

Pentana Solutions' EPC allows for the inclusion of associated parts information and integrated e-commerce website with shopping cart functionality, connected in real-time to dealer, distributor or manufacturing IT systems. Setup with the latest technology, users can access the online catalogues 24 hours a day without interruption.

“Pentana Solutions had the overall product and ability to meet our business needs. They listened to us, performed a detail fit analysis and demonstrated that the solution was flexible, yet proven.”

John Watkins, CEO, Power Farming

Tailored Features

Many easy to use features make it easy to quickly locate the needed part. Every user can customise the user interface tailored to their operations - frequently used parts can be readily accessed and saved searches can be recalled for later use. The user-friendly, simple to navigate ease of the EPC is crucial to saving you time and money.

Search Functionality

Locate parts, accessories and vehicle options using a range of powerful search and navigation tools. Besides part number, parts can be located by searching for a single or combination of categories: vehicle type, model, parts description, code, stock number, production date, chassis number, VIN, engine number, registration number and more. Alternatively, drill down through the navigation tree to individual options.

Visual Diagrams

Simply move the mouse pointer over a diagram and click on the area of interest to zoom in. Immediately see specifications, default quantity and related bulletins, giving you everything you need to ensure part accuracy. Along with hotspot diagrams - publish model photographs, exploded engine diagrams, wiring schematics and more.

Parts Detail

Parts are automatically linked into supersession chains. The chain graphically displays the complete part history, including detailed chains that consist of one to many, or many to one. To allow information to be passed onto 3rd parties, print the image with the associated details for later.

Testimonials

"The Australian truck market is highly sophisticated and competitive in nature. MFTBA's customers expect quality products supported with quality service and effective communications. Partnering with Pentana Solutions to develop an online parts catalogue allows Fuso to increase market share of genuine parts in a competitive market."

-Jeff de Ridder, GM Information Systems,
Mitsubishi Fuso Truck and Bus Company Australia

"Pentana Solutions' distribution solutions is #1 in the automotive business. It was the obvious choice. Because it specialises in IT automotive solutions, it offers tailor-made features that its competitors can't match."

-Rod Matthews, CFO, Ateco Automotive
