

**Want a more accurate  
and efficient parts  
department?**

**The answer is Logistic  
Solutions.**

# Logistic Solutions

Running your parts department from go to whoa.

## What is Logistic Solutions?

Logistic Solutions implements the latest technology and places it directly into your parts department. The three phase solution includes labelling, scanning and picking for your parts warehouse and will automate existing processes.

### Tell me more!

The benefits to labelled inventory includes:

- Reduced errors in invoicing
- Increase efficiency in stock take procedures
- Less time spent rectifying problems with incorrect orders

The benefits of the scanning phase includes:

- All data is instantaneously available for actionable stock management
- Improved accuracy in location identification saving time in put-away and order picking
- Ability to do rolling stock takes with fewer resources

The picking phase benefits includes:

- Confirmation of correct location and/or part numbers by barcode
- Immediate notification of discrepancy
- View the picker productivity reports to measure efficiency and effectiveness of pickers

### Tell me more.

Logistic Solutions will provide your business many more benefits across each phase. The truth is, you can make decisions today for the future because Logistic Solutions will have your parts department under complete control.
