

Ensure you're using
the most sophisticated
registration solution
available.

Reduce time consuming
tasks with AutoReg.

AutoReg

The electronic registration solution integrated into your DMS.

What is AutoReg?

AutoReg is the one stop solution when it comes to an electronic registration system for Queensland dealers. This solution is fully accredited by Queensland Transport and is a well established and highly recommended product widely used by Queensland Motor Dealers.

How does it work?

AutoReg offers maximum flexibility to suit your working environment, ensuring it can fit in with any operator's network group requirements.

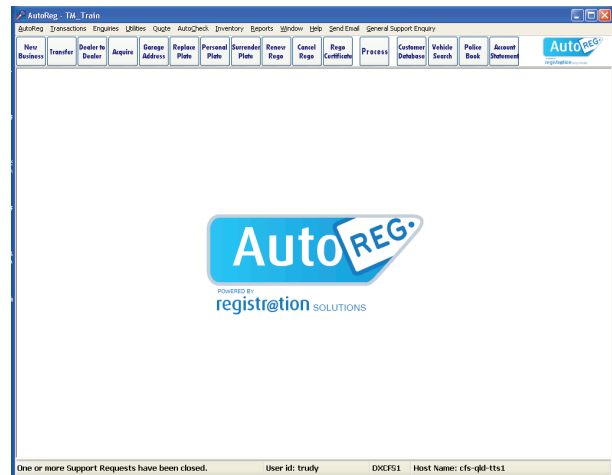

Installation types include:

- Stand Alone PC Installation
- Stand Alone with Database installed on PC Server
- Terminal Server - Remote PCs can process against a Local Terminal Server
- Consolidated Police Book and Approved Transaction List

Better yet, ERA integration to AutoReg will populate transactions with relevant vehicle and customer details without the need to create downloads or to re-enter the vehicle and customer information. This applies for both registration, REVs and VCheck transactions.

Tell me more.

By using AutoReg, you will eliminate time consuming tasks of double entry of crucial vehicle identifiers and guarantee your registration information is as accurate as your DMS database.
