

End the paper chase.

How DocuSmart Output will increase efficiency and reduce costs through automated document distribution.

- Eliminates or reduces pre-printed stationery
- Choice of formats print, fax, email, file
- Multilanguage capability including East Asian languages
- Supports all common ERP, financial and accounting applications

DocuSmart

DocuSmart Output converts raw print data into well designed high volume forms such as invoices and purchase orders.

Documents always follow the corporate style guides and look highly professional.

The system's variable data capabilities allow the printing of sophisticated forms merging variable text and images, allowing you to match your offer to your customers profile. It works seamlessly with DocuSmart Archive, automatically indexing documents using defined values such as invoice or order numbers.

Distribution

The system distributes forms in print, email, fax and file formats. It's quick, flexible and efficient. It also means piles of pre printed forms aren't taking up valuable office space. Digital Documents can be distributed in a number of formats, including PDF, TXT, CSV, XLS, HTML and XML.

Printing

The automated print module prints to all Windows based print devices including laser, inkjet, thermal, dot matrix and till slip.

Go to pentanasolutions.com/edm or call 1300 135 770 to find out more about how DocuSmart Output can save your organisation time and money.
