

**Check the Personal
Property Security
Register electronically
from within your DMS.**

**Our iPPSR solution
saves time and paper.**

iPPSR

Our Integrated Personal Property Security Register checker.

What is iPPSR?

Our iPPSR solution is an innovative tool designed to centralise the PPSR information throughout your dealership. The process of obtaining PPSR Certificates has been streamlined to conduct the process within eraPower.

What are the benefits?

Utilising our iPPSR solution you can check the status on all vehicles via ERAnet or eraPower.

The request goes out across three completely independent databases; PPSR, CarFacts and CarHistory to provide you with the most accurate information.

There's no need to print PPSR Certificates and file them with deal packs, it's all electronically stored in a centralised location.

You'll notice time and money savings through the elimination of keying information multiple times and avoiding duplicate checks from three sources.

The iPPSR centralised panel allows you to view encumbrance information, written off status and stolen status on used vehicles either in stock or appraised.

Tell me more.

To ensure you are checking the Australian register in the most efficiency way, our integrated PPSR solution handles the task from one screen. As a dealer, we want you to perform the entire process from within your DMS.
